Topics

No Vitals? No Problem! — Building a Family through Circumstantial Evidence

When there's no birth, marriage or death record, what's a genealogist to do? Learn how to use circumstantial evidence to build a family. Case Study: A Family for Isabella — tracing a woman married before the 1850 census.

When Worlds Collide: Resolving Conflicts in Genealogical Records

The Genealogical Proof Standard says to resolve conflicts in data . . . but like so many things that sound good, it's easier said than done. What exactly are we supposed to do when we encounter conflicting evidence? What are the basic types of evidence conflicts and the methods — and tips and tricks — we can use to resolve them?

“Don't Forget the Ladies” — A Genealogist's Guide to Women and the Law

Genealogical guidebooks often repeat each other in the sources they teach us about. However, there are many other useful sources. You may already know about some of these — but have you actually used them? Genealogical problem solving involves the creative use of sources that many neglect to use. Resources related to occupation, religion, poor ancestors, traveling companions, and records beyond death are filled with family data.

Beyond X and Y: The Promise and Pitfalls of Autosomal DNA Testing

Autosomal DNA testing is the new kid on the block. Learn more about this exciting addition to the toolkit of 21st century genealogists. What's in it for you, and how can you make the most of this test?
